

How to run the project:

yarn install

yarn dev

To run tests: yarn test

To run lint: yarn lint

Some clarifications about my code:

- In the design while one radio station is selected the controls and thumb image is shown at first and then the radio name is shown in the next line, but I have shown the Radio name at first and the controls under it. Because I think it would be better for User Experience as in general the user is used to seeing the name on top and then the controls. (It also happened to me, in the design at first glance I thought the controls are for Putin FM although those are for Dribble FM). Hopefully you would get my point of view here.
- Another issue is that you can see slight mismatch among fonts, size, colors in the code from the design. As I do not have Photoshop installed in my laptop I could not inspect the assets properly from the PSD, rather tried to make it similar as much as possible by seeing the PNG file. Sorry for the issue.

Thank you so much for giving me the opportunity to do this assignment. Hope to hear from you soon.
